NOTES: -

1. The information for each needle type is laid out as follows – (a) marking on needle (if any), (b) number of grooves in needle, (c) overall length of needle. Example: – **6 5 Grooves 3 3/16"** where **6** is the marking on needle, **5 Grooves** is the number of grooves in the needle & **3 3/16"** is the overall length of needle. Please note that some of the needles examined when compiling this information had no identification markings.
2. This information was compiled in good faith by our engineer, the late Dave 'Beret' Berry.
3. If anybody spots any errors, or has further information to add, please contact us with updates at andybuysbikes@hotmail.com.
