	Road Test Evaluation	✓			Distance covered 10 miles		
	Carburettor	✓			Type = Amal Monobloc		

Tester reports – The engine started readily from cold & when hot & ran well, pulling strongly from low revs, happily sitting at 55 to 60 mph. The clutch worked without fault. All the gears selected & functioned normally. Both the period brakes worked as well as you would expect. This was a pleasing machine to ride.

Notes: -

- This report is only the opinion of the tester on the day and should only be considered as a rough guide as time does not permit an in depth report. Antique machines will always require ongoing work.
- All antique machines must be thoroughly checked over & fully serviced by a competent mechanic before any use, due to their age & the length of time that they may have been stored.
- WWW.ROSPA.com recommends tyres that have been in storage for over 6 years or in use for 10 years should be replaced. For further information on tyre safety visit the ROSPA website page at <http://www.rospa.com/roadsafety/adviceandinformation/vehiclesafety/tyresafety/tyres-information.aspx#aging> or the Tyre Safe website at <http://www.tyresafe.org/>.
- The speedometer (if fitted) reading shown in this report is not necessarily an indication of the machines true mileage.
- We strongly recommend that all Flat tank motorcycles are run on **Ethanol Free** petrol, such as Aspen or Avgas.
