	Road Test Evaluation	✓			Distance covered 10 miles	
Carburettor	✓			Type = Amal Monobloc		

Tester reports – Started readily from cold & when hot. The engine ran very well, pulling cleanly from low revs. The clutch worked without fault. All gears selected & functioned normally. Both period brakes worked well. The bike steered & handled nicely. This single cylinder machine provided a good solid ride!

Notes: -

1. This report is only the opinion of the tester on the day and should only be considered as a rough guide as time does not permit an in depth report. Antique machines will always require ongoing work.
2. All antique machines must be thoroughly checked over & fully serviced by a competent mechanic before any use, due to their age & the length of time that they may have been stored.
3. WWW.ROSPA.com recommends tyres that have been in storage for over 6 years or in use for 10 years should be replaced. For further information on tyre safety visit the ROSPA website page at <http://www.rospa.com/roadsafety/adviceandinformation/vehiclesafety/tyresafety/tyres-information.aspx#aging> or the Tyre Safe website at <http://www.tyresafe.org/>.
4. The speedometer (if fitted) reading shown in this report is not necessarily an indication of the machines true mileage.
5. We strongly recommend that all Flat tank motorcycles are run on **Ethanol Free** petrol, such as Aspen or Avgas.
